About Me

Jason L. Moshier, MD, is a primary care physician at the Goshen Physicians Internal Medicine. There, he and his team are committed to providing primary care services to each and every patient. Dr. Moshier offers specialized care and treatment for patients with many different acute and chronic conditions. Once he has a clear picture of their overall health, Dr. Moshier and his team are able to provide the appropriate care to each patient.

Philosophy of Care

Dr. Moshier and his team provide their patients with the type of thorough care they need in order to gain insight into and offer a plan for their complete health and well-being. Dr. Moshier finds his work with adults, especially older adults, to be both meaningful and rewarding. He and his team are dedicated to helping patients manage their medical problems while promoting healthy lifestyle habits. Dr. Moshier strives to serve the needs of his patients with compassion and genuine concern for their problems, using as inspiration what he has learned over the years as a member of the Mennonite Christian faith community. He takes pride in paying diligent attention to the details of his patients' healthcare needs. In addition, if Dr. Moshier doesn't have the clinical expertise to help someone with a particular problem, he can easily refer them to a specialist who does.

Research/Clinical Interest

- Acute and chronic conditions
- Multiple and complex conditions: diabetes, hypertension and lipid disorders
